Abstract

The given article is aimed to reveal the benefits of using AI in the process of teaching English to young learners. According to future prospects day by day the role of artificial intelligence can rise in each sphere of humanity. Especially, the usage of AI in teaching English is increasing day by day as it is the demand of XXI century. The utilization of Artificial intelligence in the process of teaching foreign language makes the lesson more productive and enthusiastic.

Keywords: Artificial Intelligence, chatbots and virtual assistants, gamification and engagement, interactive and enthusiastic lessons.

Introduction

Transforming teaching way of English into using AI can help teachers since it taught to young learners by making lessons more engaging, personalized, and effective. As XXI century is called The century of technology each sphere is connected to technology, modern robotization. Of course, the utilization of artificial intelligence holds its own advantages and disadvantages in the process of teaching.

1. Interactive and engaging lesson

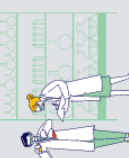

AI applications often incorporate gamification, animations, and interactive exercises that capture children's attention. This makes learning English more fun and helps maintain their interest over time. As young learners are very fresh to collect wide range of information AI helps teachers to make their lesson colorful and informative.

2. Gamification and Engagement

AI-enhanced games make learning English enjoyable and interactive. Learning English by the help of games helps learners to remember language structures more easily. By incorporating storytelling, quizzes, and rewards, applications like Kahoot! and Mondly Kids keep learners motivated and engaged.

3. Multisensory Learning Experience

As it is known learners can learn differently some are visual, auditory, kinesthetic learners. AI integrates text, audio, and visuals, catering to different learning styles. Young learners can

benefit from hearing words, seeing images, and interacting with content simultaneously, which enhances retention and comprehension.

4. Anytime and everywhere

Unlike traditional classroom settings, AI-powered tools and apps are available anytime and anywhere. This allows children to practice English outside of school, reinforcing their learning.

5. Contextual learning and expanded vocabulary

AI can suggest new words, provide synonyms, and use words in different contexts to enhance vocabulary acquisition.

6. Support for Teachers

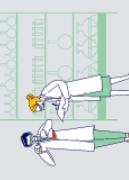

AI helps language teachers by automating administrative tasks, such as grading and lesson planning, allowing them to focus more on interactive and communicative teaching strategies. By integrating AI into language education, learners benefit from a more interactive, efficient, and personalized approach, ultimately improving their language proficiency faster and more effectively.

By integrating AI into English language education, young learners can benefit from a more engaging, personalized, and efficient learning experience that enhances their skills and motivation. However, while AI offers many advantages, it should complement traditional teaching methods rather than replace human interaction, ensuring a balanced and effective learning approach. Nowadays there are plenty of artificial intelligence platforms which makes learning more easier for example, conversational AI -Chatbots & Virtual Assistants AI-powered tutors like Chat GPT, Google Bard, or customized educational chatbots provide instant feedback and interactive learning experiences help with language learning, reading comprehension, and answering students' questions. Furthermore, each type of AI powered platforms are aimed to practice definite type of learning skills for instance, tools like Chat GPT Story Generator, Book Creator, or Story bird help children create their own stories, improve writing skills, and encourage creativity.

It is undeniable fact that AI is undividable part of human life nowadays there are plenty of advantages of using artificial intelligence in the process of teaching English to young learners.
