

## FIVE INITIATIVES AND ITS IMPLEMENTATION IN SECONDARY SCHOOLS

Sharopova Nigora Akbarovna,  
Associate Professor of the Department of "History and  
Social Sciences", University of Economics and Pedagogy

### Abstract

This article provides information about the important reforms being carried out in our country and their role in the well-being of the population, "Five important initiatives" and their implementation among young people.

**Keywords:** Five important initiatives, reform, women's employment, spiritual and educational fields, Internet attacks.

### Introduction

As you know, five important initiatives were put forward by the President of the Republic of Uzbekistan in March 2019. This includes the tasks of widely involving young people in culture, art and sports, forming in them the ability to use modern information technologies correctly, raising the culture of reading, and ensuring the employment of women. Time itself shows that meaningful spending of free time is more relevant than ever. Therefore, 5 important initiatives put forward by the president are important. As it is known, the head of our state put forward 5 important initiatives to start work in the social, spiritual and educational spheres on the basis of a new system. These five initiatives include:

**The first** initiative serves to increase the interest of young people in music, painting, literature, theater and other types of art, and to reveal their talent.

**The second** initiative is aimed at physical training of young people and creation of necessary conditions for them to demonstrate their abilities in the field of sports.

**The third** initiative is aimed at organizing the effective use of computer technologies and the Internet among the population and young people.

**The fourth** initiative is aimed at organizing systematic work on raising the morale of young people, widely promoting reading among them.

**The fifth** initiative refers to issues of employment of women.

These 5 initiatives were met with great interest by the general public. Now, extensive work is being done to introduce this experience in all regions of our country.

Based on the interest of young people in cultural centers and general education schools in districts and cities, the Ministry of Culture and the Ministry of Public Education, together with the governors, were given the task of organizing an additional 1,500 clubs. Plab news and reforms were implemented.

It was emphasized the need to organize art-amateur teams, youth theater-studios and "Youth clubs" in cultural centers, involving enterprising and talented young people and local sponsors. considering the good results of the attachment, instructions were given to spread this experience throughout the country. According to it, well-known artists are attached to districts and cities

as creative consultants and are responsible for the development of culture and art in those places, and district and city mayors provide financial and organizational support to these works. Great attention was also paid to the issue of increasing the number of highly educated personnel in the field of music and art.

The Ministries of Higher and Secondary Special Education and Public Education have been tasked to organize traveling history lessons on specific topics in museums, historical monuments, monuments and theaters.

It was noted that appointing well-known athletes who have won international competitions as leaders to local sports schools, as well as purposeful training of athletes in special extramural departments of higher educational institutions will bring good results. Tasks on increasing the number of sports schools for children and teenagers were given and they are being implemented.

Also, on the basis of these initiatives, special importance is attached to the issues of protecting young people from malicious attacks on the Internet and teaching them to use information technologies effectively.

In short, these initiatives open up more ways and opportunities for young people to rise and reach new heights. The most important thing is that if our youth understand these initiatives, use them effectively and contribute to the development of our country, it will be a great light upon light.
