The article analyzes the problems of teaching how girls should behave properly in both family and society. The author informs some promising researches in this direction.

Keywords: Girls' upbringing, major issues, researches, personality, duties, gender equality, laws, strategies, family atmosphere.

Introduction

Education of girls is one of the highest goals and duties of every mother, every learned and enlightened woman. If we look into the past, we know that our mothers performed the beautiful and great tasks of raising girls, and they were called the best of the women of heaven with such tasks. Taking the example of our mothers' life experiences, we must give love to our daughters in the first place, make them professional, let's teach them to be neat and tidy in their livelihood, let's tell them about their duties towards their spouses. Let's call for respect for the elder and respect for the younger.

When a child is born, it is the mother's duty to raise it well from childhood. Femininity is like a beautiful necklace, if a single flower pleases a woman, a single word will destroy her. If we think about it, a girl child opens a door from heaven to her father. When she grows up, she fulfills her husband's faith, and when she becomes a mother, heaven is under her feet.

The family is built on the basis of morality, politeness, hard work, it is very important in relations and communication between people, and it is of particular importance in the character and behavior of a person. If a family brings up their child in the spirit of love and loyalty to the Motherland, this feeling will accompany him throughout his life. President Sh.M. Mirziyoyev said, "The most important condition for the stable and rapid development of the country is to educate well-rounded, goal-oriented and energetic young people who have modern knowledge and skills and can take responsibility for the decent future of the country." In the legacy of Eastern thinkers, the issues of education, especially family upbringing, are given a wide place. They considered the education of children to be the main criterion that determines the fate of the society and the future of the nation. At the heart of their pedagogical views is the idea of a perfect human being as a social ideal. They dwell on the interaction of social and biological

aspects in education, and raise issues such as the fact that heredity and environmental influence are the same in education, and the unity of physical and mental health. Their ideas about the unity of mental, labor, moral, aesthetic and physical education and the ways of their implementation and about raising girls in the family cover many aspects of these problems and they form a system of views on a certain educational science.

Good parenting is not an hour or a day job as some think. Purposeful education requires patience, perseverance, great knowledge and experience from the educator does. Therefore, every parent and teacher has knowledge and skills related to education must be. Teaching children to quickly achieve positive results in education, at the same time, it is desirable to involve in certain labor processes, to teach by adding profession and specialty training. Education sometimes one of the main reasons for its ineffectiveness is the lack of discipline in the education process. How loving and disciplined the person is the more he grows up in the environment, the more he will be away from bad behavior. The complexity of human education is that it never ends, that is necessary from birth to the end of life. Based on the opinions and comments expressed above, “training program for school-age girls” was created in the direction for working with them. The purpose of “training program for school-age girls” course: School-age girls are fully prepared for society and life, expand their opportunities to adapt to society, family and knowledge about its content and functions, skills and formation of skills, their spiritual, moral, economic issues for the family to increase readiness for education, to have a place in the family and society, to pursue science, to choose a profession and to create professional motivation, family basics of life, family psychology, economy, spirituality, family and home hygiene, reproductive health, various infectious social diseases, emergency situations skills to provide first aid to oneself and others, their knowledge of dress culture and manners, the basics of food science improvement and development, formation of stable skills in all areas. Moreover, it is known that the Republic of Uzbekistan adopted on September 2, 2019 "Equal for women and men Law on guarantees of rights and opportunities for women as a legal protection, a legal guarantee aimed at one's place in society was approved. Also, the concept of gender is mentioned in the law, according to this, gender is the relationship between women and men in society in all spheres of life and activity, including politics, economy, manifested in the fields of law, ideology and culture, education and science, the social aspect of it is indicated. Legal and institutional basis of ensuring gender equality about 20 regulatory legal documents, including 2 Law, 4 Presidential Decrees, 1 Presidential Decree, 13 Cabinet of Ministers were made. This is created in accordance with the Sustainable Development Goals until 2030 developed and adapted to national gender legislation. “On Protection from Harassment and Violence of Women-girls” and “Women and Girls are on guarantees of equal rights and opportunities as men” adopted in 2019 in the Republic of Uzbekistan. It is no exaggeration to say that the laws, that is, the most important step has been taken. Every regulatory and legal document that is intended to be adopted in our country. Regulation on gender legal expertise of the draft document approved by the Cabinet of Ministers. In all ministries and agencies establishment of advisory councils on gender equality issues also serve to increase the activity of women in the social and political life of the country. It should be emphasized that in the social, economic and political sphere ensuring equal rights and

opportunities for women and men in order to achieve gender equality in the Republic of Uzbekistan by 2030 an achievement strategy was adopted. Every accepted in our country gender legal expertise of a regulatory legal document project transfer has been started.
