Keywords: Theoretical aspects of reading, universal human values, reading phenomenon, general theory of reading, category of reading "book", problems of reading, hypothesis, harmony of approaches.

Introduction

Shavkat Mirziyoyev as President of the Republic of Uzbekistan first signed law document – 2016 September 14th The Law "On State Youth Policy" also carries a symbolic meaning. Therefore, population half more maiden Consistent implementation of state youth policy in a country made up of people, young generation every one-sided perfect, intellectual potential, own firm to the position has, in the country done increasing to reforms indifferent not, to the goal aspiring, enthusiasm, patriotic, loyal Educating people as individuals is a decisive force in building a new Uzbekistan.

New Uzbekistan is a country of happy youth. The population of our country almost 64 percentage young people, that is 30 up to age those who were organization Of course . this, our state on behalf of huge responsibility loading eye If we bring it to our attention, it requires great attention and care, on the other hand, the attention paid to our youth will also give great achievements and results tomorrow. Because now more than half of Uzbekistan's labor resources are young people. In the future, every third leader will be young people. That is why young people have always been recognized as an active layer of society. arrived bride. East Awakening during also, newbies in the activity both society in the update of the youth place incomparable was. This regularly formed going this layer permanent directing and support and encouragement to stand demand will reach. This and, state by of the youth A system of measures aimed at creating favorable conditions and opportunities for free socialization and effective self-expression in the interests of the country, as well as supporting young people, is a state policy on youth. According to the World Bank, 66 percent of the world's total wealth is accounted for by human capital, that is, the level of human knowledge. In the USA this indicator national of

wealth 77 percent equal. Capital progress upbringing and from education begins. Age to the generation directed every What kind of investment will return a thousandfold tomorrow - someday. In this sense, Uzbekistan to the youth excellent desire from doing other desire no. In general In turn, Uzbekistan is setting great goals and spending money on human capital. In turn, our people have a “dream of a New Uzbekistan .” What does this mean? In the words of our President, New Uzbekistan – all of us noble our dream, hardworking, peace-loving The dream of our people! It reflects the ancient hopes and aspirations of our people for progress in a unique way.

The question remains open as to whether sufficient attention is being paid to improving the reading culture of young people, one of the most important aspects of education. is coming. However, reading intensity increase educated, An important condition for raising enlightened people, and this includes fostering a reading culture without shaping achieving It won't happen. Today on the day in youth reading culture formation process systemic study, there is the situation and analyze its development prospects, opportunities for applying foreign experiences seeing exit and in this national to oneself characteristics attention It became clear that it was necessary to take.

The socio-philosophical need to adequately assess the position of higher education institutions in Uzbekistan as institutions responsible for the formation of a well-rounded individual increased and education system in front of placed this daily from the lips come came out without targeted activation by designating giver

normative documents and methodological recommendations enough at the level not;

–of a reading culture as a process that is harmonious with modern technologies of reading, teaching and understanding, educational subjects and existing scientific and educational conditions has become an essential part of the agenda;

–The lack of theoretical justification for ways to systematically improve reading processes, considering them as an important part of educating young people within the framework of the national idea.

Attempts to theoretically understand reading as a phenomenon of spiritual life are also found among ancient Chinese and classical thinkers (Confucius, Lao Tzu, Chuang Tzu, Socrates, Plato, Seneca) [1]. The retrospective modeling of the nature of reading in different historical periods, carried out in the research of NA Stefanovskaya, allows us to emphasize our idea that purposeful influence on the activity of the reader has been carried out practically since ancient times, but the purposeful regulation of the content of reading theoretical of understanding beginning, our in our opinion, next in times appearance be started. This with together, modern in the period public social and intellectual activity encouragement tool and person change, his/her many edged to develop impact to do tool as The formation of the concept of reading is being observed.

LITERATURE ANALYSIS AND METHODS

Reading, his/her advantages, in the family reading culture content to find issues great our thinkers This Prose Farabi, Ibn Sina, It was covered in the works of Yusuf Khos Hajib, Alisher Navoi, Zahiriddin Muhammad Babur, Abdurauf Fitrat, Abdullah Avloni and others. In particular, at the beginning of the 20th century living creativity reached enlightener intelligent Abdullah Avloni, “...we should spend our precious lives strengthening our minds and

understanding from a young age.” entertainment, nonsense, nonsense that is, such as in vain words with "We should not sit idle, but read various books, newspapers, and magazines, open our minds, and strengthen our minds" [2].

Results

The sociological issues of book reading in Uzbekistan were first studied as a special object of research in the scientific works of A.A. Umarov. BIGanieva, on the other hand, studied the pedagogical possibilities of educating a reading culture. As noted above, the problem of book reading in Uzbekistan is one of the least studied areas, and in particular, the issue of forming a reading culture of secondary school students has not been studied as a holistic object of research. Readers in children's libraries by E.Yuldoshev, one of the Uzbek librarians-scientists to study leadership to do and young generation in representatives His published scientific research on the formation of a reading culture is particularly noteworthy. [3] In order to arouse interest in poetry, schoolchildren spiritual world about issues TDPolozova, YVKlyatovsky, L.A. Balashova, I. Prilish scientific in articles own on the contrary found. High A.I. Lebedova on forms and methods of guiding the learning of grade 1 students and DN Tupelskaya and other scientists. Also, in the process of writing the dissertation, in recent years in the Russian Federation protection done A.P. Abramov, NNKiselev , L.A. Menchikova, A.A. Savenkov, N.A. Seliverstova , NDYumasheva and others' dissertation research was reviewed. [4]

Discussion

1990s and 2000s at the beginning reading problems The majority of students are culturally and socially excluded from “serious” (developing) reading. socialization basis as from reading head weight around was accumulated, and this was due to the fashion for reading. From the end of the 20th century to the present day, the decrease in the share of reading in the population's leisure time problem dominance is doing.NA Stefanovskaya observed problems to oneself typical and very correct philosophical interpretation presented will: " Reading" dominant from culture individual subcultures and professional groups to the circle migration, they to this active resistance they show and reading real value save to stay movement they do (bookcrossing movement, librarians, representatives of creative intellectuals, writers)” [1].

It is known that the formation of a reading culture is carried out in various ways . One of them is the proper organization of children's reading. Their various manifestations are described in special literature devoted to children's reading. is given. Children reading famous from researchers one V.A. Nevsky sought to eliminate confusion in the classification of children's reading. He distinguishes the following types of children's reading and gives a separate definition for each:

- family reading;
- at home reading;
- in the classroom reading;
- from class outside read.

Uzbekistan has entered a new stage of development based on the principle of “From national revival to national progress.” The intensity of the new era has led to the establishment of noble values and traditions in the life of society, in particular, our people, especially, young generation

spiritual-intellectual potential, consciousness Reading is essential in raising a well-rounded individual who lives with love and devotion to their homeland and people, and in raising a well-rounded individual who lives with love and loyalty to their homeland and people. culture increase separately importance profession is being done. Books for young people reading skill if formed, maturity on the way remaining all The book itself teaches actions.
